---

What is the estimated volume of the thick sludge in VB25141? Have you contacted Dynamic to determine if they will do anything to retrieve their box? Since they clean boxes onsite when returned by customers that fail to clean them maybe they will pick it up.

Dean (Lonstar) submitted a proposal to remove the north tank farm ASTs when they are RCRA clean in exchange for the ASTs but did not offer to dispose of any of the waste. Lancer (Riverside) will be inspecting all the ASTs next week, have been provided with copies of the AST's waste analytical data reports and I should be able to determine if they will offer move/dispose of waste in exchange for the ASTs.

Mickey

FYI

This box has a thick fudge consistency so it will have to be manually broken up for the air mover to suck it up.
